HE400i的耳机配线可以拆卸, 耳机配线使用分开的接地线连到每一声道, 以将左右声道间的串扰降至最低。信号线插头佩带标准3.5mm小插头, 可以通过转接头接到6.35mm的插口上。

Message from the Founder

Thank you for your purchase of a HIFIMAN product. We take great pride in offering audio products that provide best-in-class performance and value.

Though it seems like only yesterday when I started HIFIMAN as a passionate audiophile, we just finished our first decade in business and eagerly look forward to an exciting future. The company continues to grow at a rapid pace, and I'm proud to say that the HIFIMAN brand is one of the most respected in the industry.

Even with our success, the one thing that has not changed is my passion for music and creating products that help recreate the experience of a live performance. My team shares this passion, and we, in turn, humbly share that with you.

Thank you again for your purchase. I hope you will find this guide useful in learning about your new HIFIMAN product. I'm confident that it will bring you countless hours of listening pleasure.

Happy listening,

Fang

Product Overview

The HIFIMAN HE400i is an open-backed headphone with specially designed planar magnetic drivers. Connection is made via the supplied cable with screw-on connectors using separate ground leads for each channel to minimize crosstalk between the channels.

Using single-ended drivers, HE400i delivers a lifelike soundstage and spatial imaging. Its increased efficiency of 93dB allows it to be driven with a modest size amplifier or even be used with a portable audio player or smart phone.

HE400i is 30% lighter than comparable planar magnetic headphones allowing the listeners to comfortably enjoy music for hours on end. In addition, a newly-designed headband and beveled hybrid earpads provide added comfort as well as improved sound quality.

Specifications

- Frequency Response: 20Hz - 35kHz
- Impedance: 35 Ω
- Efficiency: 93dB
- Weight : 370g (13.05oz)

Accessories

- Headphone Cable (1.5 meter or 4.9 Feet; 3.5mm plug)
- Earpads: 1 pair (on the headphone)
- ¼"(6.35mm) headphone adapter

Note: The HE400i is designed to be used with its earpads on at all times. If for some reason, you need to remove the earpads, please replace them as soon as possible.

Headband Adjustment

If the top of the headband does not touch your head, move the sliding black block on each side of the headband so that the headband rests on top of your head.

Earpad Design and Replacement

The HE400i earpad is a beveled design with varying thicknesses to conform to the human head. Should you need to remove and reinstall the earpad (i.e. for replacement) keep the thinner part on the front side of the ear cup and thicker part on the back. Fit the mounting flange onto the rim of the ear cup. Then press around the mounting flange to make sure the earpad snaps into place.

Set-up and Operation

1. To obtain optimum performance, please allow at least 150 hours of constant use for break-in of your new headphone. This break-in period does not have to be at high volume.
2. The connectors utilize 3.5mm mini plugs on the headphone side. Push the connector straight onto the socket. Repeat the process with the other mini plug connector.
3. The supplied cable adapter with the large $\frac{1}{4}$ " (6.35mm) jack is connected with the typical headphone output of an amplifier or even better with a headphone amplifier. Please be aware that many home amplifiers will switch off the loudspeaker output when a headphone is connected.
4. To clean your headphone, please use a soft, slightly damp cloth only. Do not use any detergents and make sure not to let any fluid enter the open sides of the headphone. The leather headband can be maintained using standard leather care products. When your earpads become worn and no longer offer a good connection to your head, you should replace them with new ones which can be supplied from your dealer, or head-direct.com. Note: The internal drivers do not require maintenance. Any attempt to remove or modify them will void your warranty.
